Blind Auction

Instruction

Create a program that simulates Blind Auction.
[https://en.wikipedia.org/wiki/First-price_sealed-bid_auction]

1. `Print Logo - Blind Auction`

2. `Ask user name`

3. `Input Bid`

4. `If there is another user, type YES, then the program asks for next bidder by cleaning everything from console`

5. `Finally, If there is not another bidder return the highest bidder with bid amount`

Sample Output:

```
LOGO

What is your name?: Elshad
What is your bid amount?: $100
Are there any other bidder?(Y/N)Y
---clear---
What is your name?: Jane
What is your bid amount?: $120
Are there any other bidder?(Y/N)N
The winner is Jane with a bid of $120
```

Hint

- Create dictionary for bidder and their bid.
